

Accessories for side ventilation systems

Our company provides complex supplies of additional assortment to side ventilation systems. These include:

- timbering for fixing the technological elements of the side ventilation systems (B, C, D and E)
- timbering for the installation of anti-purge nets
- welded wire mesh (to prevent cattle from accessing the tarpaulin systems)
- anti-draft nets and other protection/ventilation elements
- edge tarpaulin ends for all types of side ventilation systems

Welded wire mesh
